Change Notification

Contec Disinfectant Range – New manufacturing facility

Details of Change

We are pleased to announce that we will complete the building and installation of our new UK manufacturing facility for cleanroom disinfectants in Quarter 1 2025.

The new manufacturing facility is located close to our existing facility on a new industrial site.

Address of the new facility will be:

Contec Cleanroom UK Ltd
Unit 12, Birchwood Way
Ashwood Business Park
Ashington, NE63 0XD
United Kingdom

The facility has been purpose built for Contec and will feature an increased square metreage of cleanroom space, state-of-the art filling and bagging lines and automated packing. The new facility will significantly increase our manufacturing capability, allowing us to meet both current and future demand.

Critical parameters such as solvents, raw material specifications, and packaging materials remain unchanged. New production processes will be validated under a Validation Master Plan and information shared when available. There will be no functional changes to the specification of the final products, nor any secondary processes such as sterilization by gamma irradiation, if applicable.

Reasons for Change

Due to significant increases in demand for Contec's range of cleanroom disinfectants we need to move to a new manufacturing site with more capacity.

Effective Date

The new facility is located very close to our existing facility and to ensure a smooth transition the current Ashington manufacturing plant will continue to manufacture products for up to 12 months.

We anticipate that the installation and qualification of the first manufacturing line (70% alcohols) will be complete at the start of Quarter 1 2025, with the remaining products following after this. Additional validation activities will commence once each new line is operational, and information will be available to you.
