

10 June 2024

Dear Customer

Change Notification – Amendment to specification.

Contec Neutral Detergent

Please be advised that the pH range of Contec NeutraKlean products will be expanded slightly.

RTU Sterile product The pH range of the product after irradiation (if applicable) is currently 6.5 – 8.0.
This will change to 6.0 – 8.0.

RTU Filtered Product – The pH range of the diluted product is currently 6.5 – 8.0
This will change to 6.0 to 8.0.

The new range will therefore be pH 7, \pm 1; which is still considered neutral, as seen in pH ranges of other neutral detergents available in the current market.

This change will take place as of 12 September 2024.

The certificates of analysis will be amended accordingly. This will not affect how the product is used or the GHS classification of the product.
