## Certificate of Irradiation/Processing Format Standardization - LSCCN073

Dear valued customer,

Ansell has, and always will be, focused on providing exceptional customer service, to ensure this we have decided to standardize the format of our Certificate of Irradiation (CoI) and Certificate of Processing (CoP) to enable the online certificate retrieval system to run more efficiently.

From 1<sup>st</sup> January 2024, all BioClean™ branded product CoI/CoPs will be in the Ansell format regardless of whether the product has been sterilized at Ansell Melaka (Malaysia), Steris Malaysia, Grand Ten Malaysia or Hospitech Malaysia. The format change can be seen [here](#) in details.

The indication as to which sterilization facility was used to sterilize the product you receive will still be visible via the sterilization sticker on the shipper case as shown on the attached slides, as well as by the company name and address shown on the certificate. The sterilized product will still display the red indicator dot (gamma irradiation) or green indicator dot (EtO sterilization) on the internal packaging once sterilized.

The certificate format standardization will be implemented from 1<sup>st</sup> January 2024 and certificates will still be available via the online certificate page: [www.ansell.com/life-sciences/certificates](http://www.ansell.com/life-sciences/certificates)

Please contact your local Ansell Customer Service department or your local Ansell Sales Representative if you have any questions regarding any of the information contained within this announcement.

Thank you for your continued loyalty and trust in Ansell.

Sincerely,

**Ekaterina BOGOMOLOVA**  
EMEA Sr. Director, Marketing
